1. C Program To find largest and smallest number and their positions
2. C program to input and print n elements in an array
3. C program to find sum of all elements of an array
4. C program to find maximum and minimum element in array
5. C program to find second largest number in an array
6. C program to copy all elements of one array to another
7. C program to insert an element in array
8. C program to delete an element from an array
9. C program to print all unique element in an array
10. C program to print all negative elements in an array
11. C program to count even and odd elements in an array
12. C Program to sort an array in ascending order using bubble sort
13. C Program to sort an array in descending order using bubble sort
14. C program to count total number of negative elements in array
15. C program count total number of duplicate elements in an array
16. C program to delete all duplicate elements from an array
17. C program to count frequency of each element in an array
18. C program to merge two sorted array in ascending order
19. C Program to merge two sorted array in descending order
20. C program to find reverse of an array
21. C program to put even and odd elements of array in two separate array
22. C program to search an element in the array
23. C program to sort an array in ascending order
24. C program to sort an array in descending order
25. C program to sort even and odd elements of array separately
26. C Program to search an element in an array using Binary search
27. C Program to search an element in an array using linear search
28. C program to replace all Even elements by 0 and Odd by 1
29. C Program to Find Union & Intersection of 2 Arrays
30.
